*It is one of the best books. Better than ever, though I am quite late in starting to read this one. I am delighted to explain how this is the best book I have ever studied in my personal lifestyle and might be the best PDF for ever.*

Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Studies of Animal Life: A Series of Laboratory Exercises for the Use of High Schools The following studies are the result of seven years experience in the high schools of Chicago, where the experiment of applying modern laboratory methods to the study of zoology and botany in secondary schools has already passed through the trial stages and become in some measure an acknowledged success. As the title indicates, the subject-matter of this book is animal life and not animal forms, the authors point of view being to study living animals and to interpret their activities, so far as possible, instead of compiling a series of zoological obituaries. For the majority of high school pupils who do not go to college, being early forced into the active duties of life, zoology has a peculiar mission, since it awakens a healthful interest in living things and aids in forming habits of exact and philosophical observation. It is far more important to make naturalists of such pupils than anatomists, consequently all laboratory dissection is omitted. Only advanced pupils showing a decided inclination for such work, or those having some definite purpose in view, should be encouraged to attempt dissection so long as other more congenial avenues of discovery remain unexplored. A briefer comparative study of several related animals seems to lay a better foundation for future additions to the pupils knowledge than a more exhaustive study of single types.
