Reviews

This publication will be worth purchasing. It really is written in simple terms instead of difficult to understand. It has been designed in an exceptionally simple way and is particularly only right after I finished reading this ebook in which basically modified me, alter the way I believe.

ACROSS THE USA AND CANADA IN 1887: A GERMAN SCIENTIST EXPERIENCES NORTH AMERICA

iUniverse, United States, 2011. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.In 1887, the renowned German scientist Louis Lewin and his uncle, John Warburg, set out across the Atlantic on what was to be an arduous seven-week journey spanning the North American continent, east and west. Lewin's wife, Clara, remained in Berlin with their daughters. In daily letters, Lewin shares with Clara his account of his trans-Atlantic trip, and of his subsequent travels by rail and steamer to Montreal, across Canada to Vancouver, thence to San Francisco, and from California back east. While in America, Lewin investigates the status of medical school education here, visits the newly-established laboratories of the Parke-Davis Co. in Detroit, Michigan, and attends the International Medical Congress held that year in Washington, D.C. A specialist in the study of poisons and hallucinogens, Lewin also visits the opium dens of San Francisco's Chinatown, graphically describing what he sees there. These letters are more than a pedestrian account of places visited and sights seen; they express Lewin's musings on the nascent economic power of the United States, on the disparities between rich and poor that were evident then, and on the natural resources that he observed from his train window. He is also frank about his likes and dislikes, and in assessing his own strengths and weaknesses. Louis Lewin was born in 1850 in Tuchol, in what was then West Prussia, to Orthodox Jewish parents fleeing the pogroms in eastern Poland. The family arrived in Berlin in 1856. His primary-school teachers, recognizing the young Lewin's aptitude for science, arranged for his admission to a renowned Gymnasium; that in turn enabled him to enter Berlin University. After receiving his medical degree there, Lewin s...
