It is important to provide an institutional framework that governs the operations of the industry, including its functions, structure, powers and funding. Operations in the upstream of the industry comprise licenses, leases and contracts. The operating stocks and Iraq strategic stocks are also necessary. The needs of the downstream natural gas include both technical and commercial licensing regulations and conditions, as the network, gas supply licenses, transportation pipelines licenses and the whole sale market in addition to the possibility of third party access, customer protection, the pricing regime, public service obligations, competition and market regulation.
